Crystal Lake Central High School Jump Starts Radio Control Car Club

Crystal Lake – Great concentration and a love of cars are the driving forces behind the newly formed Radio Control Car Club at Crystal Lake Central High School.

Nine students meet every Tuesday and Thursday after school to build their cars from kits and race. The group began this spring. “The purpose of the club is to provide an opportunity for students to be positively involved at CLC outside of the regular school day,” explained Tim Bacak, faculty sponsor.

“In addition, the club promotes self-confidence and team building as well as highlighting the importance the relationship between academics and the world,” Bacak added.

Bacak credits donations and assistance from Crystal Lake Hobbytown USA and Associated Electronics for helping the club “get off the ground”. Car kits are expensive and challenging to put together.

The club is open to all students and is led by Industrial Tech Teacher and Department Chair Tim Bacak, Principal Steve Olson and Student Teacher Jim Weiseman.
